Greetings

Dear Heguru Families,

We are so excited about starting another month with all of you, our families. We can't wait to see and hear how much our students' learning progress and also hear about all the exciting things that you are doing with your child at home.

We are also thrilled to welcome all of the newly joined families! We are beyond happy to meet you all!

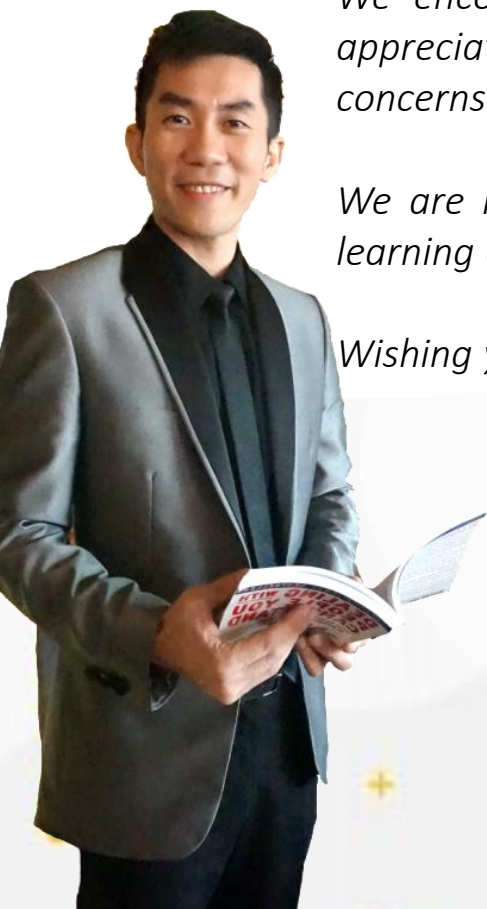

The days your children spent with brain stimulation is a very important time of their lives and we are definitely thankful to have this chance to spend some of this special moment with them.

We encourage open communication with all of you and appreciate if you could share your comments, questions and concerns with us.

We are looking forward to a school time filled with much learning and progress!

Wishing you ahead for a Great November!

Mr. Suryanto Lim
Principal of Heguru Indonesia

Recognizing Your Child's Strength: 8 Multiple Intelligences

At present, an intelligent child is not solely that one who excels in the academics. This concept was proposed by *Dr. Howard Gardner* in 1983. He suggested that there is more intelligence beyond the traditional intelligence quotients. This was accepted by the modern society at large as children are actually formed distinct from each other and are special in many ways.

This idea of multiple intelligences is one way of discovering and honing extreme human potential in different fields of endeavour. They are the following:

1. Linguistic Intelligence

If your child excels in this field, he is the word-smart type. He can get familiar with a long string of words, he gets inclined to poetry, he can tell stories, and can even read at a very early age without being taught by others.

2. Logical and Mathematical Intelligence

Your child may not be very interested in literature but he could be the number or reasoning smart kind of a person.

Article

He gets interested in chess or checkers, sees patterns, has the ability to organize blocks and formulate logical reasons.

3. Spatial Intelligence

The picture-smart kid has the ability to visualize pictures in his head, draw in correct perspective, finds ways easily, look at pictures and images and copy them right and even anticipates the movements in space. You can test this intelligence as you throw out the ball and the child is able to catch before it hits the ground.

4. Musical Intelligence

Children interested in music are called the music-smart. They remember songs without even knowing the lyrics, sing in tune, and make or produce various sounds.

5. Bodily Kinesthetic Intelligence

The child is body-smart once he exhibits the ability to perform well in plays and puppet shows, climb, run, jump, hop and skip.

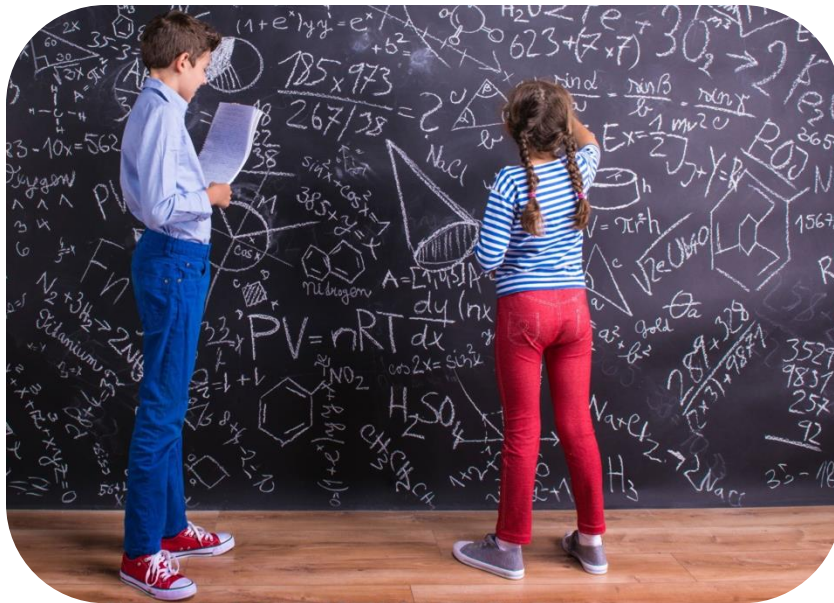

Article

6. Social or Interpersonal Intelligence

No man is an island for people smart kids. These kids are capable of solving quarrels, care for others, good leaders and they make friends easily.

7. Intrapersonal Intelligence or the Self-Smart

Children who are independent and accomplish things on their own could take pride of the intrapersonal intelligence.

8. Naturalist Intelligence

The nature-smart kid shows affection to the natural world around him. He finds interest in creatures and could identify them easily.

Knowing your child's inclination would help you to prepare activities that would enhance his intelligence.

Understanding these multiple intelligences will help you discover and unveil your child's hidden talents and hone them for improvement and proper utilization.

Testimony

Heguru[®] family

Kimi Johan

2 years 8 months old

Joined Heguru: March 2018

Parents: Mr. Johan & Ms. Ria Utomo

Kimi has been attending Heguru classes since she was twenty-six months old and for the last one and a half years we can really see her improvements especially her capabilities in memorizing. She easily recites country names by looking at flags, element names in the periodic table, public signs, the presidents of Indonesia in order and musical symbols among other things.

In one occasion she surprised us by reading three-letter words in sentences. Her awareness of her surroundings, maturity, focus and concentration are developed during her time at Heguru. We as parents are aware that the skills she acquired during early life can help her to excel at her later age. Heguru method helps her improve her skills in many ways and we are looking forward to be surprised by her other abilities.

We as her parents, see many benefits and developments in her after studying at Heguru and helps her in her formal school now.

Thank you Heguru!

Materials Knowledge

MANDARA

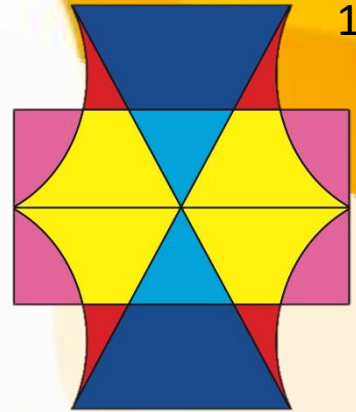

This is one of the favorite activities in Heguru for the students. In Mandara activity, students are acquired to remember shapes and the colors as well as the number of Mandara. Children like it because they love to draw and give color by using crayons.

In Heguru Class, Mandara is a shape that could be seen exactly the same from every direction (this is unlike Mandala from Buddhism). Mandara is a practice to memorize colors and shapes in certain period of time. Usually it divided into 2 steps, the first step is to remember the color and the second step is to remember shape and color.

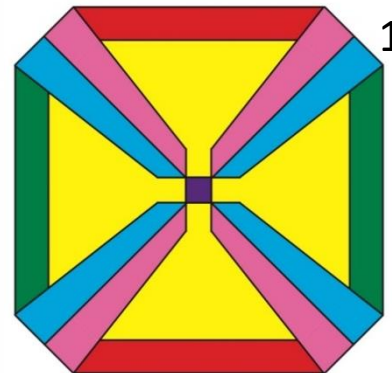

The aim of remembering Mandara's number is also good to recognize the whole shape of mandara. By remembering number and shape together, it is going to be basement of picture memorizing.
